

Villa Solbakken

Nerja, ES

Fictitious test villa to try out the features in MinePlaner.

Plot

The plot as it was when we bought it – olive trees and a view of the Mediterranean.

Groundwork

Groundwork: foundation and retaining wall. There was bedrock in the ground, so it had to be broken up with a jackhammer.

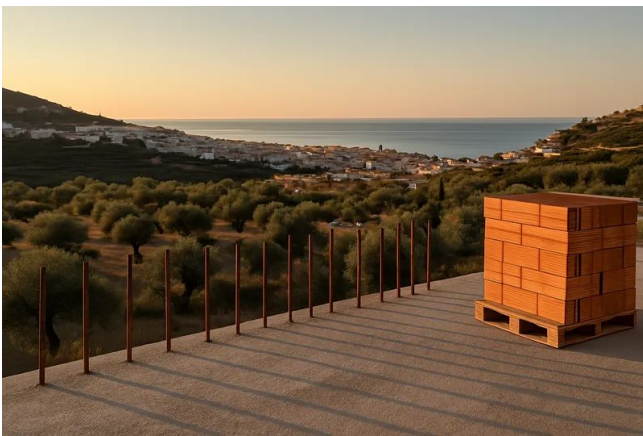

The construction site

no
The shell construction in September: concrete framework and...

The shell structure seen from the lower side of the plot. Both slabs have been cast.

The view from the terrace on the second floor – this is where breakfast will be.

Visualizations

The architect's sketch of the living room with an open plan towards the terrace.

Completed villa with white plaster, terracotta roof tiles, blue shutters, large terrace with pool and bougainvillea on the wall
